INDUSTRY OVERVIEW

Louisiana has a strong trapping heritage. From the early 1900s through the 1980s, Louisiana led the continent in the production of wild fur pelts.

During the early 1900s the Louisiana fur market supported over 20,000 trappers and 1,000 fur buyers and dealers. Muskrat populations expanded, and trappers harvested over 9 million pelts worth \$12 million in 1945. Louisiana produced almost 65% of North American fur during this period.

A much larger non-native rodent, the nutria, was farmed in the state in the late 1930s and escaped and/or was released into the near perfect habitat of coastal Louisiana. Nutria multiplied quickly and by 1962 surpassed the muskrat in numbers harvested. Between 1962 and 1982 average harvest by trappers topped 1.3 million nutria annually, representing over 60% of the total fur industry. Today, nutria harvest is an essential part of habitat management due to the nutria's aggressive eating habits.

The Louisiana Department of Wildlife and Fisheries (LDWF) manages the state's 12 different species of furbearers (beaver, bobcat, coyote, gray fox, mink, muskrat, nutria, opossum, skunk, raccoon, red fox, river otter). During the past 10 years, the state has averaged producing 17,937 pelts annually. The average annual production of nutria during the past 10 years has been 6,234 and raccoon has been 5,968. These two species alone provided approximately 68% of the value of an industry worth over \$1 million annually to Louisiana trappers, including the \$6.00 per tail Coastwide Nutria Control Program (CNCP) payments to participating trappers.

Although fur harvest has continued to decrease due to a poor market, trapping license sales have increased for the past four seasons, thus keeping this Louisiana heritage alive.

The Louisiana Department of Wildlife and Fisheries (LDWF) contracted with Glenn Delaney to stay abreast of any Legislative movement that might be of interest to LDWF, the Fur Advisory Council, or the Alligator Advisory Council.

Mr. Delaney met with key Members of Congress and their staff to educate them on issues important to Louisiana’s sustainable use wildlife programs. He carefully monitored the legislative efforts of animal rights groups and their advocates on Capitol Hill so that any anti-trapping or anti-sustainable use bills, such as the Refuge from

Cruel Trapping Act (HR 5127), could be addressed in a timely manner.

Mr. Delaney sought funding for a variety of programs that impact Louisiana wildlife management programs. Mr. Delaney worked with Congressman Garret Graves to develop an amendment to the Nutria Eradication and Control Act of 2003, H.R. 3399, which would increase the level of the authorization of appropriations in the original Act for Louisiana. He pursued funding for research on infectious diseases affecting Louisiana’s alligator population. Although funding for this research was not

appropriated, the Senate Appropriations Committee Report stressed the need for the USDA’s Animal and Plant Health Inspection Service (APHIS) to focus on this critical issue. He also worked with Senator John Kennedy’s office to request funding to develop a CITES ePermitting system.

Mr. Delaney worked closely with LDWF administration and program managers to address pertinent legislative issues. The funding for the contract was split equally between the Fur Advisory Council and the Alligator Advisory Council’s budgets.

EDUCATION PROGRAM

The first goal specified in the legislation that created the Fur Advisory Council identifies the need for education, and the Council and LDWF focuses primarily on this directive. The Council has taken a two-tiered approach to education focusing on both outreach education and trapper education.

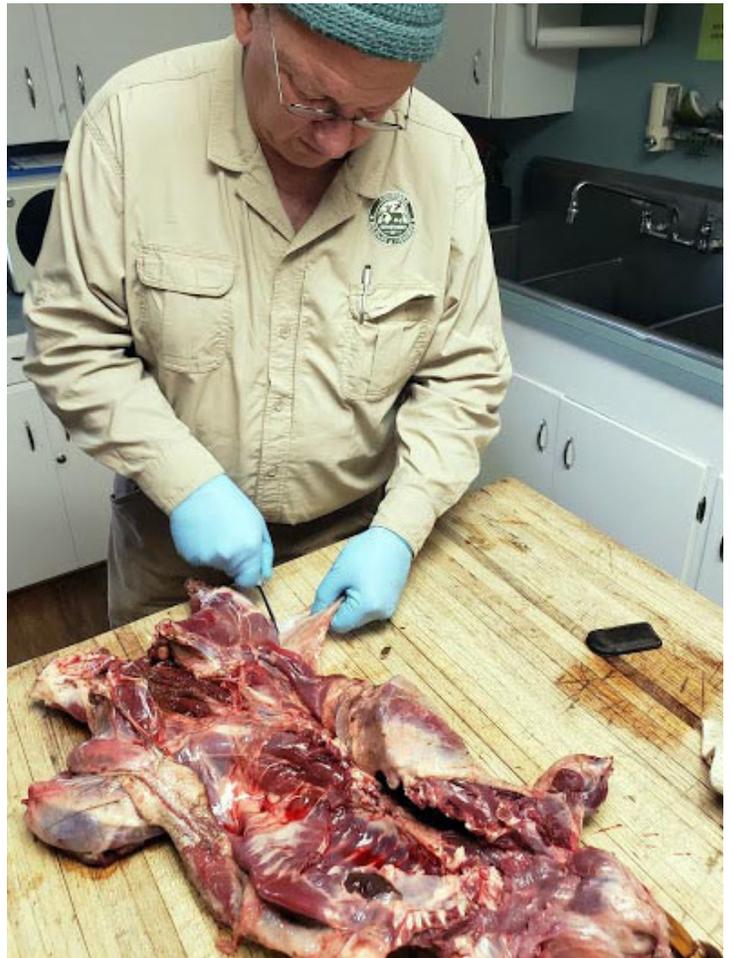

The Council participated in over a dozen outreach events such as National Hunting and Fishing Day and Archery in Louisiana Schools' tournaments during this fiscal year. Staff also participated at Ocean Commotion, an event targeting teachers and elementary and middle school children. The Council provided biological facts and educational support to other LDWF staff who presented at schools and at other outreach events. The Council also partnered with a number of educational and outreach organizations such as the Audubon Zoo and Wetland Watchers to reach a broader audience.

LDWF and the Louisiana Trappers and Alligator Hunter's Association hosted a trapper instructor workshop followed by five trapping workshops around the state. These workshops attracted a wide range of students, including teenagers, biology students, working adults, and retired adults. LDWF also ran a three-day trapping school, where students set and ran their own trapline and skinned their own harvest under the supervision of an instructor. Due in part to this program, youth trapping license sales have increased the past three years.

LDWF continued its partnership with the Association of Fish and Wildlife Agencies (AFWA) for the Louisiana Level 1 Online Trappers' Course. The online course covers Louisiana trapping regulations, ethics, safety, and habitat management as well as practical trapping skills.

Although all trapper education is voluntary in Louisiana, trapping students are encouraged to take the online course as a prerequisite to the hands-on workshops and the trapping school.
